

GAALOU INES

JUNIOR SOFTWARE ENGINEER · FULL STACK DEVELOPER

+21622209847 Tunisia (UTC+1) · Open to remote ines.gaaloul18@gmail.com linkedin.com/in/inesgaaloul Portfolio github.com/gaaloulines

SUMMARY

Software Engineering graduate (2026) seeking a **Junior Software Engineer / Full Stack Developer** role. Specialized in **full-stack web development** and **generative AI integration** (RAG, LLMs, OCR), with hands-on experience designing and building scalable web applications, REST APIs, AI-powered microservices and modern software architectures. Comfortable working across the full software development lifecycle in Agile environments, from requirements analysis and system design to deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C + +, PHP, SQL

Frontend: React.js, Next.js, Angular

Backend: Laravel, Spring Boot, NestJS, .NET, FastAPI, REST APIs, Microservice Architecture

AI: LLMs (Qwen2.5, Gemini), RAG (Retrieval-Augmented Generation), OCR (PaddleOCR), NLP, Embeddings, FAISS, llama.cpp

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: Docker, AWS, Git, CI/CD

Tools & Methods: Jira, Postman, Figma, Scrum

EXPERIENCE

Anyppli (*Monastir, Tunisia*) — Full Stack Engineer, Laravel & React.js

February 2026 – June 2026

- Designed and built an intelligent community platform for cosmetic product analysis and recommendation: React.js/TypeScript PWA, admin dashboard and Laravel/MySQL REST API.
- Automated cosmetic ingredient extraction and normalization in a FastAPI AI microservice powered by PaddleOCR and Gemini Flash.
- Architected a local **RAG** pipeline (BGE-Large-EN-v1.5 embeddings, FAISS vector search, Qwen2.5 LLM via llama.cpp) generating ingredient-level compatibility verdicts with confidence scores.
- Implemented an embedding-based hybrid recommendation engine, a **Dupe Finder** and a **Skin Twin** feature matching users by skin-profile similarity.
- Shipped real-time notifications with Laravel Reverb (WebSockets), JWT/OAuth 2.0 authentication and full Docker containerization (Laravel Sail).

Mediwave (*Sousse, Tunisia*) — Full Stack Intern, React.js & NestJS

July 2025 – September 2025

- Built a microservice-based medical platform managing 500+ patients and 100+ practitioners.
- Implemented a smart scheduling module handling availability, appointments and automated notifications.
- Designed a secure digital medical records area (lab results, prescriptions, clinical notes).
- Integrated instant messaging, a news feed and a collaborative events system for healthcare professionals.

Vaerdia Solutions (*Sousse, Tunisia*) — Full Stack Intern, Spring Boot & Angular

June 2024 – August 2024

- Developed a customer-support application handling 300+ tickets, cutting processing time by 60%.
- Set up multi-role authentication, dynamic dashboards and REST APIs with Spring Boot.
- Added advanced filtering and automated deployment with Docker.

PROJECTS

AI Summarization & Tone Analysis Tool

- Built a full-stack application (Next.js, Python NLP) for automatic summarization and tone analysis of 500+ documents.
- Implemented automatic keyword and topic extraction with PDF and DOCX support.

Real-Time University Forum

- Developed a real-time collaborative forum (Angular, Spring Boot, Kotlin mobile) serving 500+ users.
- Ensured instant discussion synchronization through WebSockets.

EDUCATION

Higher Institute of Applied Sciences and Technology of Sousse (ISSAT Sousse), Tunisia

2021 – 2026

National Engineering Degree in Software Engineering (5-year program, equivalent to a Master's degree)

CERTIFICATIONS

Artificial Intelligence Fundamentals – IBM • CCNA2 v7 – Cisco • CyberOps Associate – Cisco

LANGUAGES

Arabic: native • **French:** C2, full professional proficiency • **English:** C1, professional working proficiency

COMMUNITY INVOLVEMENT

IEEE ISSATSo (*Executive Committee*) — SIGHT Vice-Chair

2023 – 2026

Organized technical events (RocketBot, AI/robotics workshops, **500+ attendees**); coordinated SIGHT social-impact projects.
